FOR YOUR CELEBRATION

Your guests' photos. All in one place.

Every guest has the best moment on their phone — and you never get to see it. EventDrop collects exactly those photos: one QR code on the table is all it takes.

1. You create your album and download the card with the QR code as a ready-designed PDF.
2. Your guests scan the code and upload their photos — no app, no account, no sign-up.
3. You see everything in your gallery. At the end, you download all photos together as a ZIP (from Spotlight).
